William K. Reilly, Administrator  
U.S. Environmental Protection Agency  
401 M Street, SW  
Washington, DC 20460

Dear Mr. Reilly:

This is to request that the U. S. Environmental Protection Agency review the validity of the claim made by the Ethyl Corporation that the HiTEC 3000 additive reduces nitrogen oxide emissions and fuel volatility.

The Department's interest in this claim is to find economical alternatives to reduce mobile source emissions. This information will be useful during the development of State Implementation Plans dealing with the ozone nonattainment issue. Your timely review will be appreciated.

Sincerely,

A handwritten signature in dark ink, appearing to read "William C. Eddins".
